

OZ99

AUG 19 1999

Dear Mr. Snow

I am writing in response
to CALFED's plan to increase
dam water storage in dams &
the building of new reservoirs.
I am very opposed to these
initiatives as they are environmentally
detrimental to the wildlife and
natural beauty of the river.
There are many other alternatives
for energy sources. Please reply
to this letter as I would be
interested to hear your response.
The health of our environment
is the most important issue of
the future.

Thank you,
Effie Lipnor
